IT Support, Networking and Systems Administration

The top companies hiring for IT Support and Network Engineer roles are CenturyLink, GCI Com and Amazon. Demand for IT workers is high and should continue to grow as firms invest in newer, faster technology and mobile networks.

The Networking and Systems Administration courses cover a vast range of certifications to help you upskill and progress in your career.

The collection provides qualifications from the most highly recognised and widely used vendors and teaches skills in different areas of IT; from cloud and security to mobility, infrastructure and more.

IT SUPPORT

£22,000

Responsible for dealing with basic day to day technical issues with hardware, operating systems and networking. Half technical, half customer service, this role is predominately troubleshooting and resolving problems within a business or retail environment.

NETWORK ENGINEER

£30,000

Responsible for implementing, maintaining, supporting, developing and, in some cases, designing communication networks within an organisation or between organisations.

INFORMATION SYSTEMS MANAGER

£35,900

Responsible for the implementation of technology within an organisation and directing the work of systems and business analysts, developers, support specialists and other computer related workers.

CHIEF INFORMATION OFFICER - CIO

£98,000

The most senior executive in an enterprise responsible for the information technology and computer systems that support enterprise goals.

Earning potential

Your salary can range anywhere from **£22k** for an entry level Networking Engineer, to heights of **£100k** for Networking/IT directors.

CompTIA Linux+

With Linux being the central operating system for much of the world's IT infrastructure, Linux+ is an essential credential if you're working in IT.

Linux has grown into an industry leading software and service delivery platform, it's used for everything from supercomputers and web servers to virtualised systems and Android phones.

Its use across technologies has grown extremely quickly, hence why there's a massive demand for qualified Linux professionals.

With CompTIA's Linux+ certification, you will get the fundamental skills and knowledge needed to successfully configure, manage and troubleshoot Linux systems.

CompTIA Linux+ covers common tasks in major distributions of Linux, including the Linux command line, basic maintenance, installing and configuring workstations, and networking.

CompTIA Linux+

Course modules...

- ✓ System Architecture
- ✓ Installation and Package Management
- ✓ GNU and Unix Commands
- ✓ Advanced GNU and Unix Commands
- ✓ Devices and Filesystems
- ✓ Scripting and Administrative Tasks
- ✓ Essential System Services
- ✓ Networking Fundamentals
- ✓ Security, Data, and Accessibility

CompTIA Server+

The CompTIA Server+ certification validates that you can plan, secure and maintain a variety of server equipment. These skills are in huge demand in today's IT environments.

This certification demonstrates an impressive knowledge base that narrows the skills gap and provides the hands-on experience that you need.

Technologies and trends such as virtualisation, data centers, software defined networking, security risks and network attached storage improvements are dramatically changing the server environment.

This certification will give you confidence to deal with big changes in the IT industry.

CompTIA Server+

MCSA Windows Server 2012

Earning an MCSA Windows Server 2012 certification qualifies you for positions as a network or computer systems administrators, or as a computer network specialist, and it's the first step on your path to becoming a MCSE. All you need to do is pass these three exams...

Exam 1 - Installing and Configuring Windows Server 2012: This measures your ability to install and configure servers, as well as configure server roles and features.

You'll also be tested on configuring Hyper-V, deploying and core network services, your understanding of installing and administering active directory, and creating and managing group policy.

Exam 2 - Administering Windows Server 2012: By passing this exam, you'll prove your understanding of how to deploy, manage, and maintain servers, as well as your ability to configure the following: file and print services, network service and access, Network Policy Server infrastructure.

Exam 3 - Configuring Advanced Windows Server 2012 Services: The final of the three exams is verifying that you can configure and manage high availability.

MCSA Windows Server 2012

Course modules...

- ✓ Installing and Configuring: Servers
- ✓ Installing and Configuring: Storage
- ✓ Installing and Configuring: Print Services
- ✓ Installing and Configuring: Hyper - V
- ✓ Installing and Configuring: Networking
- ✓ Installing and Configuring: DNS
- ✓ Installing and Configuring: Active Directory
- ✓ Installing and Configuring: AD Groups & GPOs
- ✓ Installing and Configuring: Security
- ✓ Administration: Deploying and Managing WDS
- ✓ Administration: Updating and Monitoring
- ✓ Administration: File Services and Encryption
- ✓ Administration: Network Services and Access
- ✓ Administration: RADIUS, NPS, and NAP
- ✓ Administration: Service Accounts and Policies
- ✓ Administration: Managing Active Directory
- ✓ Administration: Group Policy Processing
- ✓ Administration: Managing GPOs and Preferences
- ✓ Configuring Advanced Services: HA
- ✓ Configuring Advanced Services: VMs and DR
- ✓ Configuring Advanced Services: Storage
- ✓ Configuring Advanced Services: DAC
- ✓ Configuring Advanced Services: DHCP & DNS
- ✓ Configuring Advanced Services: AD Domains
- ✓ Configuring Advanced Services: AD Replication
- ✓ Configuring Advanced Services: PKI
- ✓ Configuring Advanced Services: Federation

MCSA Windows Server 2016

Earning an MCSA Windows Server 2016 certification qualifies you for positions as a network of computer systems administrators or a computer network specialist. It's the first step on your path to becoming a Microsoft Certified Solutions Expert - MCSE. All you need to do is pass these three exams...

Exam 1 - Installation, Storage, and Compute with Windows Server 2016: This measures your ability to install and configure servers, plus the configuration of Nano Server and the creation of images for deployment.

Exam 2 - Networking with Windows Server 2016: You'll prove your understanding of how to deploy, manage, and maintain servers as well as your ability to configure the following: DNS DHCP, IPAM, VPN and Direct Access by passing this exam.

Exam 3 - Identity with Windows Server 2016: This will verify your ability to configure and manage high availability, configure file and storage solutions and implement business continuity and disaster recovery.

You'll also be required to answer questions on configuring network services, Active Directory Domain Services and Active Directory Certificate Services, as well as web application proxy implementations.

MCSA Windows Server 2016

Course modules...

- ✓ Installation Options
- ✓ Upgrading, Managing, and Monitoring
- ✓ Maintaining Servers and Images
- ✓ Storage Solutions
- ✓ Data Deduplication and Hyper-V Setup
- ✓ Hyper-V Configuration
- ✓ Hyper-V Networking and Containers
- ✓ Containers and Hyper-V Migration
- ✓ Implementing Failover Clustering
- ✓ Managing High Availability Solutions
- ✓ VM Motion and Network Load Balancing
- ✓ IPv4 and IPv6 Address Management
- ✓ DHCP Management
- ✓ DNS Name Resolution
- ✓ Configuring DNS Zones
- ✓ Implementing IP Address Management (IPAM)
- ✓ Network Connectivity and Remote Access
- ✓ Securing Remote Authentication
- ✓ Supporting Branch Office Technologies
- ✓ Advanced Network Infrastructures
- ✓ Active Directory Domain Controllers
- ✓ Active Directory Accounts and Permissions
- ✓ Active Directory Object Management
- ✓ Maintaining Active Directory
- ✓ Trusts and Site Management
- ✓ Defining Group Policy Objects
- ✓ Implementing Group Policy Preferences
- ✓ Active Directory Certificate Services
- ✓ AD Federation Services and Web Application Proxy
- ✓ AD Rights Management Services

MCSE Productivity

This certification will teach you the skills needed to migrate businesses onto the cloud. It teaches you how to increase user productivity and flexibility, reduce data loss, and improve data security.

You have the ability to choose which exam you would like to take from the following:

Exam option 1 - Core Solutions of Microsoft Sharepoint Server 2013: The first option is based around Sharepoint. You'll be tested on your ability to design a SharePoint topology, plan security and install and configure SharePoint farms.

You'll be asked to show that you can create/configure web applications and site collections, as well as maintain a core SharePoint environment.

Exam option 2 - Advanced Solutions of Microsoft Sharepoint Server 2013: This is also Sharepoint based, and measures your ability to plan business continuity management, a SharePoint environment and upgrade/migrate a SharePoint environment.

It also tests whether you can create and configure service applications, as well as manage SharePoint solutions, BI, and systems integration.

MCSE Productivity

Course modules...

Microsoft SharePoint Server 2013 modules include:

- ✓ Core Solutions: Information Architecture
- ✓ Core Solutions: Logical and Physical Design
- ✓ Core Solutions: Installation
- ✓ Core Solutions: Web and Service Applications
- ✓ Core Solutions: Authentication
- ✓ Core Solutions: Security and Taxonomy
- ✓ Core Solutions: User Profiles and Search
- ✓ Core Solutions: Maintenance and Monitoring
- ✓ Designing Advanced Solutions: Upgrading
- ✓ Designing Advanced Solutions: Continuity
- ✓ Designing Advanced Solutions: Search Services
- ✓ Designing Advanced Solutions: Content Support
- ✓ Designing Advanced Solutions: Applications

Microsoft Exchange Server 2013 modules include:

- ✓ Core Solutions: Deployment
- ✓ Core Solutions: Mailbox Server Management
- ✓ Core Solutions: Client Access Servers
- ✓ Core Solutions: Configuring Mobile Connectivity
- ✓ Core Solutions: Message Transport
- ✓ Core Solutions: Access Control
- ✓ Core Solutions: High Availability and DR
- ✓ Core Solutions: Monitoring and Troubleshooting
- ✓ Advanced Solutions: Availability
- ✓ Advanced Solutions: Site-resilience Solutions
- ✓ Advanced Solutions: Advanced Security
- ✓ Advanced Solutions: Compliance and Discovery
- ✓ Advanced Solutions: Migration and Federation
- ✓ Advanced Solutions: Troubleshooting
- ✓ Advanced Solutions: Unified Messaging

Any questions?

RHCSA - Red Hat Certified Systems Administrator

Key Facts

30 - 40 HOURS

1 X 150 MINUTE EXAM

PREREQUISITES:
RECOMMENDED FOR EXPERIENCED
RED HAT ENTERPRISE LINUX
SYSTEM ADMINISTRATORS
LOOKING TO VALIDATE YOUR
EXPERIENCE

RHCSA - Red Hat Certified Systems Administrator

The training in this course gets you up to speed with using Red Hat products.

It'll teach you important skills in areas of system administration which are common across a wide range of environments and deployment scenarios.

Specifically, you'll learn all about essential Red Hat tools, how to operate running systems, how to configure local storage and file systems as well as the best ways to deploy, configure and maintain systems.

Not only will you learn how to create and configure various Red Hat systems, you'll also be taught how to actually manage certain elements, specifically user groups and security.

RHCSA - Red Hat Certified Systems Administrator

Course modules...

- ✓ The Environment
- ✓ The Command Line
- ✓ Administration and Permissions
- ✓ Scripting and Scheduling
- ✓ Processes, Networking, and Logging
- ✓ Advanced Networking
- ✓ Remote Connections and Access
- ✓ File Systems and Device Management
- ✓ Boot Process and Installation
- ✓ Introduction to Virtualisation
- ✓ SELinux and Troubleshooting

Any questions?

Course content is regularly updated by our training providers in order to stay current with industry trends. The above modules may therefore vary slightly, if you have any questions give us a call on 01273 907 919.

Additional training options

Check out the wider training and course content available to you within this collection...

- ✓ Ruby On Rails
- ✓ Python Fundamentals
- ✓ Microsoft Sharepoint Server 2013: Core Solutions
- ✓ Microsoft SharePoint Server 2013 - Developing Core Solutions
- ✓ Microsoft SharePoint Server 2013: Designing Advanced Solutions
- ✓ Microsoft SharePoint 2010 SP1: Administration
- ✓ Microsoft SharePoint Server 2010 SP1: Configuring
- ✓ Microsoft Exchange Server 2010 SP1: Configuring
- ✓ Microsoft System Center Essentials: installation and Configuration
- ✓ Microsoft Windows 8.1: Supporting Windows 8.1
- ✓ Microsoft Windows 8.1: Configuration
- ✓ Microsoft Windows: Deploying Windows Devices and Enterprise Apps

✓ TRUSTPILOT

About us...

We owe it to ourselves to be the best and most knowledgeable professionals we can be. Training with us is all about doing just that; achieving your goals and living your best life.

My continued passion for learning and development motivated me to start the **Learning People**. I wanted to empower people like you with real world skills and expertise that employers are looking for.

We take your goals seriously by listening to your ambitions and tailoring your learning so you get the skills you need to be a knowledgeable and successful professional.

If you're committed to taking control of your future and advancing your career, you're a perfect candidate.

Patrick Aylmer
Founder and CEO

Why choose us?

Up-to-date

Our training is always forward thinking and up-to-date - you'll receive the best, most relevant training to help you advance your career.

Customer support

Our friendly **StudentCare™** team are there to help you every step of the way - they'll be your support from introducing you to the training, all the way through to your certification.

Exclusive partners

We're partnered with major job boards across Europe and America to give us insight into employers requirements so we can tailor your training to match their desired needs.

Trusted and accredited by the giants

You'll receive training that's affiliated with top institutions such as Learning Performance Institute and our training is approved by the likes of **BT, Jaguar, NHS, VISA** and **Bupa**.

Live your best life

You'll be joining a huge community of active learners. With over 50,000 students worldwide, you'll be in good company.

Superb student reviews

It's important for us as a company to be transparent and honest with our students, which is reflected by our excellent **TrustPilot** reviews.

Student benefits

CV detox

Our goal is to arm you with the tools required to enter a new career or progress in your current one. We'll detox your CV, help you write a cover letter, advise on your LinkedIn profile and give you tips on shining in interviews.

Manageable costs

We want to help you find the easiest way of funding your learning, which is why we'll set you up with a payment plan so you can pay in installments each month.

Money saving offers

All our UK students will receive an **NUS extra card** which can be used for discounts across hundreds of different brands, including 10% off everything at the Co-op.

Continuous learning

We believe learning shouldn't stop after you finish your exams. That's why all our alumni will have the opportunity to get **exclusive access to more training content**.

Supporting you

We're all about helping you reach your goals, whether it's starting a new career or validating your skills as an expert in your field.

From the word go, you'll have support from our dedicated **StudentCare™** team. They'll help you get settled and show you around your training.

Throughout your training you'll hear from them regularly. They'll check in to see how you're getting on and see if there is anything you need, even if it's just a bit of support and motivation.

They'll give you hints and tips for getting the most out of your revision and help you book your exams if your course has them.

You can contact them throughout your training at any time. **StudentCare™** are dedicated to supporting you throughout your entire learning journey.

“Absolutely recommend these guys. The flexibility and quality of the courses made attaining professional qualifications dead easy.

The level of customer service is great. I have never felt like I was on my own.

If you’re looking to improve your career prospects then these guys are the best education providers around.”

Excellent

Why online learning?

Studying online rather than in a classroom comes with many benefits, here are some of them...

LEARN ANYWHERE

Study at home, in your office, on the train - anywhere with an internet connection.

LEARN ANYTIME

Study at the weekend, during your lunch break, after you've put the kids to bed - anytime that is convenient.

SAVE MONEY

Save money on travel, textbooks and stationery.

PREPARING FOR YOUR EXAMS

Save time by speeding through the content you know and taking your time on the areas you're less familiar with.

AT YOUR OWN PACE

Take a break any time you want - busy at work or are your kids on half term? Just log back in and pick up exactly where you left off.

GREATER KNOWLEDGE

You'll develop greater knowledge - studies show we retain information longer when we learn at our own pace.

EMPLOYERS PREFER IT

Employers love online learners - being self-motivated is always something employers look for.

INSTANT RESULTS AND FEEDBACK

Instant results and feedback - online quizzes and tests will ensure you're on track to achieving your training goals.

MOST UP-TO-DATE CONTENT

Get the most up-to-date content - remote delivery of curriculum allows instructors to keep materials current.

We have over **50,000**
students around the world...

...experiencing the **next**
generation of online learning

Frequently asked questions

Where do I take the training?

All of our training is completed online, via learning portals, this means you have round the clock access to training no matter where you are.

Where can I get started?

Once you have enrolled onto a course, our **StudentCare™** team will issue you with your login details and ensure that you can access the training fully, showing you around the system through a virtual orientation and chat over the phone.

They provide you with support every step of the way, so please do not hesitate to contact us with any questions or concerns that you may have.

Can I use a tablet?

We always recommend learning on either a PC or Mac, it's a far richer and immersive experience - helping you to retain information.

If you have any questions on setup, our **StudentCare™** team have the answers.

Does certification guarantee me a job?

We can't guarantee you will get a job after gaining a certification - no reputable training company would.

However, we can guarantee that certification opens doors to interviews, giving you opportunities to stand out from the crowd which you might otherwise have missed out on.

Students of the **Learning People** have been offered employment on the fact, on top of their interview performance, that they were currently studying for certification and gaining the necessary skills for the job.

Is there a finance option?

We offer interest free finance options on all of our courses.

Ask our career consultants for more information when you enquire about a course.
